Custom Wrap Layout Sheet

Go to dragsterderby.com/wraps to find out to use this wrap layout sheet.

© 2017 AeroRacers Inc and Great American Dragster Derby. All Rights Reserved.

The rectangular part marked in solid black on the top body part rear portion is to be cut out in order to clear the roll bar support. Cut on the marked center line leading up to the rectangle so the wrap goes over the roll bar support during install. Other areas marked in solid black should be cut out after the wrap is installed on the car body and has dried completely.
